In defense it said that the sloop had no light displayed, that the night was dark and hazy, and as soon as the sloop was discovered the steamer stopped and backed and the sloop was told to after her course, but kept on the unskilifulness of the person at the helm on board the sloop. The points are denied. Testimony was taken.

up for argument a few weeks since, and partly completed. It is again on.

The points of the case are, that Mesers. Affred G. Benson, Edgar J. Bartow, Charles Kelsey, Eithu Townsend, and Wm. S. Parker, (latter now deceased,) applied a year or two ago for the appointment of Commissioners under the State law of 18:5, and obtained a State license to run a ferry from the foot of Wall-st, New-York, to the foot of Montague-st, Brooklyn. The Composition of New-York (Henry E. Davies, and of the Composition of New-York (Henry E. Davies.) license to run a ferry from the foot of Wall-st, New-York, to the foot of Montague-st, Brooklyn. The Comsel of the Corporation of New-York, (Henry E. Davies, Esq.) on behalf of New-York, then applied for an injunction restraining the licensees from establishing said ferry, and to compel them to give up the licenses so obtained, it being contended on the part of the Corporation of New-York, that it has an exclusive right to the ferry franchise, and that the State law is unconstitutional and void. A temporary injunction was granted, and the present motion on the one side is that it be rendered perpetual, and on the other that it be dissoired.

The points are similar to the Fulton Ferry application,

argued before Judge Barculo, and decided, except that that application was for a ferry already established, and this is to establish one at a new location.

Smith shandoned his contract and the owner and to em-ploy other persons to complete the contract, and that he had been paid in full.

The Judge, on the trial, required that the original con-tract should be produced. It was shown that the work in question had been done under the contract; also, that Mr. Smith had owed \$2,000 to Mr. Carman for lum-ber previous to the contract having been entered into. Several witnesses were called to prove that the con-tractor had been paid for all that portion of the work done by him.

done by him.

The Court, in rendering its decision, said that \$3,300 had been earned and was payable at the time the contractor admitted his inability to go on with the work, and the owner gave him notice he should capley others to go on with the work at his expense. Some money had been paid to the contractor, but the two first payments of \$81,100 each were passed to the credit of the contractor for lumber sold to him previous to the contract. Such credits, though fair between owner and contractor, cannot be deemed, I think, to be in good faith as against a person claiming under the lien law; but if they were excluded, there was enough due to the contractor at the time the lien was filed to entitled the plaintiff to recover. When the owner determined to go on at the expense of the contractor, he was not authorized to make payments for work done subsequently, to the prejudice of a claimant by lien. At the time of the filing of the lien the whole was finished, and the whole price reserved by the contract was not paid. Plaintiff was entitled to preference to persons employed by the owner. Besides, the owner having enjoyed the services of plaintiff, is liable on the principle of a quantum marrit as to any money payable at the time the lien was filed which had not been paid in good faith by the owner to the contractor.

In addition to these considerations, this Court has done by him.

The Court, in rendering its decision, said that \$3,300

which had not been paid in good faith by the owner to the contractor.

In addition to these considerations, this Court has decided that the owner is to be considered under the lat section of the act liable to lien holders for the full amount of the contract price without reference to the amount of work done, and that he is to be considered to that amount in the light of a security for the contractor to cover the person entitled to a lien, subject to a deduction of the amount previously paid by him in good faith secording to the terms of the contract, and to the amount of any prior liens existing on the premises.

Judgment for plaintiff in amount claimed.

The line of march was through Hicks, Pierrepont, Faiton and Court-sts to the Cemetery, where the procession arrived about 4 o'clock, when, after the ceremony of placing the cap upon the monument,—during which time the band played a funeral dirge,—Rev. Mr. Seeney, of the Washington st. M. E. Church, offered ap a prayer appropriate to the occasion. Richard Underhill, Esq. followed in an able addess, in which he 'expatisted upon the many virtues of the deceased and the high esteem in which his memory was held, not only by the Cempany to which, in life, he was attached, but by the entire Division. A benediction pronounced by Rev. Mr. Seeney closed the proceedings, and the large concourse, which had assembled to winness the ceremonies withdrew. Among those present were Brig. Gen. Duryes, Maj. George C. Ball, and Brigade Inspector J. J. Dillon, besides a number of distinguished civilians.

The spot selected for the Monument is called Casary Hill, on Green Bough-avenue. It is of Italian marble, about sixteen feet in hight, and cost three bundred and fity dollars. The inscription upon the side facing the avenue is as follows:—"Erected to the Memory of Lieut. David W. Baldwin; (Born March 16, 1821—Died January 25, 1852;) by the Franklin Guards, 'Like Washington he sought not for ambitton, but did his douy." On the obverse is the inscription:—"Erected by the Franklin Guards, Company D., 14th Regiment N. Y. S. DUTIES OF THE POLICE. - An ordinance lately passed, designating the dusies of the police force, mentions, among other requirements, the following:— Police officers are allowed to follow no other business: rouse officers are another to find a be case of consistent must all be prepared to act, if required; can be excused from duty only on account of sickness or disability, obey all lawful orders from persons in authority over them, allowing no one to letter at the station-houses; they shall not, while on duty, drick any spirituous liquors, nor ener a place where such is sold, except in the discharge of duty; shall receive no rewards, except by permission of the Mayor, they shall communicate no information which shall receive no rewards, except by permission of the Mayor; they shall communicate no information which may enable the guity to escape, or secrets stolen goods; nembers of the department must not render assistance in civil cases, except to prevent an immediate breach of the peace, or to queil a disturbance; they must report to the captain all suspicious persons and places, all bawdy houses, receiving shops, pawabroker's shops, junk shops, second-band dealers, gamblers, prostitutes and other suspicious persons congregate; they must caution strangers against entering such places, and against pickpockets; and direct strangers and others to their places of destination. Members of the police may be dismissed, if guilty of disodedience of orders, drunkenness, violent, coarse and insolent conduct, and neglect of duty or unfitness for its performance.

A SUNDAY QUESTION .- The Common Council passed an ordinance which forbade the opening of butchers shops on Sunday mornings for the sale of meat. Mayor Berry vetoed it. The Board rejected the meat. Mayor Berry vetoed it. The Board rejected the veto on the ground that more than ten days had transpired after its passage previous to the veto. The difference between the Mayor and Alderman is whether the Sundays shall be counted in the ten days. This is most emphatically a Sunday question.

PRIZE FIGHT .- Yesterday morning a party from New-York passed through to Beshwick Meadows, where two of them, James Ferguson and Patrick M'Grath, fought for \$100 a side. On the eleventh round Ferguson was the victor. No arrests of the parties.

A FIGHT .- Some fighting was done at the gate of the Houston-st. Ferry, on Monday night, among firemen. Several of the New-York men were handled roughly. It was rumared in Williamsburgh, yester say, that one of them had died of his injuries, but we learned on good authority, that such was not the case, and is not likely to happen.

CLEARING THE SIDE WALKS .- On Mon-CLEARING THE SIDE WALKS.—On Mon-day evening the Common Council ordered that the side-walks of Grand and South-Seventh sta, should be kept clear from all controctions, such as wagons, carta-jumber, dry goods, groceries, boots and snoes, hard-ware, crockery, &c. Accordingly, yesterday morning, Street Commissioner Cornwell requested the services of the police, and notice was given to the shop keepers and residents on those streets that the continuance of the abuse would not be tolerated. The awnings are not to be disturbed. To-day articles not removed will be seized by the authorities.

DROWNED ACCIDENTALLY .- A laboring ean named John Kierran, a resident of Williamsburgh, ell offthe pier at the foot of South-Ninth-st, on Monday night, and was drowned. His body was recovered ye berday morning near the same piace. A small vessel had been laying there on Monday, and men on board, and those at work on the pier had been drinking beer until intoxicated. On board all were drunk except the opan intoxicated. On board all were drung except to esptain and the cook. The latter said that he saw Kier nan in the water throwing up his hands, but could not aid him. Coroner Schapps held an inquest, and the ver dict of the Jury was, "Accidental drowing while in a state of intoxication." The deceased leaves a wife and

### JERSEY CITY ITEMS.

Common Council .- " What a pickle we are in!" is an idea which is making a decided im-pression upon the minds of the people, as well as bear-ing with considerable weight upon the consciences of ing with considerable weight upon the consciences of the Aldermen. Another attempt to organize last night failed, for want of a quorum. Those present were Brokavmen. It may be asfe to intimate that the Mayor may be called upon to convene the Aldermen on Thursday, by which time, it is to be hoped, an effort to elect a President and authorize an election will be successful. Should it fail then, the chances will stand poor for an arrangement previous to Monday evening, 21st. The owners of property and others are becoming interest-ed, and somewhat fearful of the results.

Festival at the Reformed Dutch Church, in Waynest, by which the ladies are raising funds toward the late longrovement of that house, was a mutual blessing. The strawberries and ice cream were very acceptable after such a "regular baking day" as yesterday. Their house—the basement room of the Church—was full, and a large amount was realized.

TUESDAY, June 15-P. M.

The market for the fancy Stocks is still active with a continuance of the buoyant feeling noticed for some days past. The disposition to buy was marked especially at the SecondBoard, where prices generally were well sustained. The leading Stock to day was Reading, of which 3,000 shares were sold, closing at 82 g at the Second Board, an advance of 1/2 per cent. The friends of this road are very confident of 90 or 100 during the present year. Erie was 88% at the close, an improvemen of 5 per cert. The street appear to entertain the impres sion that the coming dividend will be 4 per cent, but this is not the tene of what information can be obtained from the Company. The Dividend Committee will proba bly make a report on the dividend fund on Wednesday In the present condition of the Company, wanting as they do, more money to build double track, it might be embarrassing to declare less than 4 \$7 cent., although premium of 8 P cent for the year could undoubtedly be safety made. Norwich is steady at 56, and 8 mning ton at 544 2 544. It is understood that notwithstand ing the decline in the rates of freight, Stonington will continue a 5 F cent. stock, with a large surplus as a sinking fund for the Bonds. At the present price it pays 9 P cent. Hudson River is still improving, having advanced 1 P cent. Zinc was steady at 121q. There was considerable orders for Canton, and 80 was paid on time. The good prospects of the coal trade is putting up all Stocks connected with that branch of industry. sylvania Coal Co. with sales of 1,450 shares went to par, an advance of 21/2 per cent on yesterday's price, and Delaware was firm at 125,

The sales of Railroad Bonds reached \$70,000, at very full prices. Erie securities had an upward tendency. State Stocks were firm. Indiana Canal Preferred Fives touched 50. Pernsylvania fives were 98, and at the close selo was bid. Government Stocks were still improving.

The market for Sterling is firm but not very active at 104 2 1042 for leading names. Franca \$5.164 # \$5.15. The supply is moderate, with but few commercial bills in the market.

In Freights there is no change of importance. Engagements to Liverpool: Cotton, 5-32d. 1,000 bbls. Flour, 193 : 25,000 bush. Grain, 314d 24d. 3,000 tos. Lard at previous rates; Beef at 18d in the packets, and 3 in the steamer. To Havre, the market is duil; Cotton was taken at Jac. To Glasgow, 1,500 bbls. Flour, 18d. To London, 1,000 bbls, Turpentine 2 A Deal charter was made from Bic to London at 80/, and another from St. Johns to Hull at 72/6. Five charters for Guano from the Pacific, were made at \$12@\$13

There is being put up for the steamer to-morrow about \$650,000 in gold and \$100,000 in sitver. A portion of the gold is conditional, but it will probably all go. These shipments at present are a decided relief to the Banks, such is the plethora in their vaults. One Wall-st, Bank holds \$2,100,000 in coin.

There is a futile attempt upon the part of one or two Banks to fix the rate of interest at 5 ? cent., and some 4244 P cent. loads have been called in by them. The supply of private capital seeking in vestment is, however, so large that the loans were easily replaced at the same rates.

In Railroad County and City Bonds of sound character there is a fair business doing at private sale, although the orders from abroad are less than they were

consequence of the summer interregnum of business. We hear of sales of Bourbon, Lafayette and Meson County, Ky., Bonds at 90 and interest; Chicago City 6s 9716 and interest; Louisville 6s, 96; Evansville, 9516 and interest; Chicago and Galena Railroad 7s, 95 and interest; State Line 7s, par. The Albany Northers are held out of market for par. New-York City 5s, 1800 are 105 bid; 1870, 104; and Jersey City 6s, 104 bid.

are becoming scarce in this market. A cotemporary i this City has expressed fears that the large amount these securities will absorb the capital of the country &c., but we think his fears are exaggerated. The amount is not so large as is generally supposed. The Mortgag Bonds of first class leading Railroads (particularly the Western States) are considered, and deservedly among the safest and most desirable investments the can be made. The security, in the first place, when properly go up, is ample, and the convertible clause of great value. We say Western Roads, because the cost, as compared with Eastern Roads, is generall about one third to one half. The average cost of Easter Roads is \$40,000 to \$60,000 per mile, that of Wester about \$20,000 to \$25,000, often much less. In th Western States, wealth, population, and the products the soil, are increasing in a ratio that defies calculation almost belief; consequently the business of their lines Railways increases in the same proportion. This is show in the great increase of business on the finished roads Ohio and Indiana. The regions lying between the pa allels of 37 and 42 of North latitude, embracing Wester New-York, Pennsylvania, the States of Ohio, Indian and Illinois, is the granary of the United State supplying all the States and portions of Europ with breadstuffs and provisions, almost every ac of which is susceptible of the highest cultivation only a small portion, however, of which country is yet under cultivation, making railroad transportation necessary to the proper development of those region There is not a leading Western Railroad yet comple but pays large dividends to the shareholders-from to 14 P cent. P annum, after paying expenses, inclu ing the interest on their debts and repairs. The annual increase of receipts on most of them reaches this year from 25 to 50 P cent. The stock of each leading West ern road completed is at or about par, and much in demand for home investment. That of the Cleveland, Columbus and Cincinnsti Road is now 110; Columbus and Xenis, 106; Little Miami, 108; Cleveland, Palasville and Ashtabula (not yet completed), 109; Michigan Southern, 134; Northern Indiana, 116; Madison and Indian apolis, 110; Indianapolis and Terre Haute (Just com

pleted), 100, The Stock of the several Roads between Albany and Buffalo, the Central New-York Line, are now ranging from 100 to 136 P ct., and notwithstanding the competition of the Canal and the Erle Road, their receipts this year show an increase of from 20 to 30 4 cent. upon those of last year. The first class main lines of Western Roads have generally made a debt equal to about one-third and not exceeding one-half of their cost, to pay for rails and equipments. There are and will be projects of doubtful usefulness and profit, and care is necessary in making any investments, not more in Railroad Securities, however, than in loaning money on Bond and Mortgage on Real Estate.

The Little Miami Road has just made a dividend for six mon he ending 31st May, of 10 P ct, with a surplus of about \$100,000 of former earnings. Other instances of Western lines, partially opened for traffic, are numerous where the earnings are equal, and in some cases beyoud those above noted.

Mr. Draper will sell at auction on the 23d inst. \$32,000 of the Blossburg and Corning Road. See

The amount received at the Sub Treasury is \$90,380. Paid, \$47,244. Balance, \$4,135,253.

The Dry Goods trade is less active, yet considering the season, usually a dull one, it is good. A lingering demand exists for Summer Goods, while an early demand has set in from the South-West, and California buyers are also in market, the recent advices having been favorable. Stocks are light. Neither home manufacturers supplying the trade profusely, nor the importers receiving largely. Prices are benefitted thereby, and continue to strengthen. The condition occasions a constant inquiry from jobbers for all articles suitable for the fall season at moderate prices. Heavy Brown Sheetings are very steady at 72714c. The extremely light supply will effect a further ad-

vance. The demand is active. Bleached Goods are also in fair request and firm. The export inquiry is liberal. Drills are steady and in good home and export demand at old prices. Osnaburghs are scarce and firm-Denims are inactive. Ticks are more active at a slight improvement. Printing Cloths are in demand, and prices tend upward. Prints still in limited demand, but at lower rates, being out of season. Fall styles are appearing : Ginghams are fnactive, it being between seasons. Lawns are firm with a moderate demand. De Laines are dull. Cloths are still active; clothlers are buying, and higher prices being anticipated stimulates some activity. Cassimers are in fair request, principally plain styles. Fancies are dull and heavy. Sati nets again are active, clothiers buying freely. Lineeys are selling rather briskly at 144gc. Jeans are dull. Fiannels are active and firm. Blankets are steady, and at moderate rates. Foreign Goods are very dull, but the stocks both in fire and second hands are unusually light. Clothiers are buying low priced Woolens for their fall trade, and the lothing importers, who form a class by themselves, are more busy than any others. Prices continued to rise with the reduction of stocks and imports. Wool is stead ly though gradually advancing in England; and all im ports of Woolen Goods must come at a much higher price. Raw Silks have not continued to advance, and e learn the French market is busily employed on sup olies for the United States. The few Goods now arriving are for the fall sesson and to supply the early orders for the South and South West, but the opening prices will be at an advance on Staple Goods. The Vestern States pay up well, and their demand has for the last two months absorbed a large amount of Dry Goods. The interior of this State, however, has af forded the greatest demand, and the greatest increase of consumption is there found. The course of prices being up, and the stocks everywhere being small, a good usiness is expected in the ensuing season.

The following is a statement of the movement in Cotton since the 1st of September last, as compared with the previous three years;

The Washington (Pa.) Reporter of Wednesday says :

nesday says:

At the carnest solicitation of gentleman on the line and at both ends of the Road, we have called a public meeting in this week's Reporter, to be held at Canonaburg on the 4th on this month, with a view of taking the initiatory steps in reference to the long talked of connection by Reilroad between this Borough and Pitzburg, by way of the Chartiers Valley, one of the most feasible and practicable routes for such an improvement in the State. We hope this call will be responded to by the peeple, in a becoming manner. This short road will be one of the most profitable in the Union.
